

SUMMER WORKSHOPS IN TASMANIA 2019

manufacturing herbal medicine

Herbal elders Linda Bates and Sandra Parker, with over 30 years of clinical experience each, will teach you to manufacture medicines and creams for a professional dispensary and for your home.

LINDA BATES is a traditional western Herbalist trained by Dorothy Hall and the women of her family. Since 1993 she has been organically growing her herbs in the Blue Mountains, making tinctures & creams with them, and teaching others how to do it.

SANDRA PARKER is a traditional western Herbalist. She has been consulting, creating and manufacturing medicines for 30 years. For the last 20 she has been living in the pristine Nth of Tasmania, growing the herbs in her organic garden to produce the remedies and creams/balms for her patients.

In 2015 they presented the Pindari Seminars together. With their clinical experience, their common love of herbs and all things healing they inspire each other and anyone listening.

This 4 day workshop in the beautiful town of Deloraine, will include a day at the organic farm of Marleen Herbs, to see how the fresh plant medicines of P.P.C are made and meet the plants.
www.tincturesandgemmos.com.

The workshop includes demonstrations followed by guidance and supervision while you make your own. With fresh herbs from Sandra's garden we make medicine strength water infusions and decoctions, hot and cold oil infusions, fresh and dried herb tinctures made with alcohol and with apple cider vinegar, oxymels, honey syrups and fresh juices. Using the juices, tinctures, water infusions, flower essences, essential oils, hydrosols, and oil infusions we teach you to make unique creams, ointments and salves. Then we help you create your own to take home.
