

PRESCRIPTION REFILL POLICY

Check your Prescriptions for refills and bring your requests to your Provider at your next scheduled appointment. We discourage telephone requests for refills, and you may be asked to schedule an appointment.

Should you require a refill and you are not scheduled for an office visit, **please contact your pharmacy, do not call the Doctor's office, your pharmacy will contact our office.**

The pharmacy generally requires **48 hours notice** to refill Prescription requests.

It is your responsibility to have a sufficient supply of your medication. It is not our responsibility to keep track of your refills. We will gladly provide you with samples on an as needed basis according to the Providers requests if samples are available. **Please note that the pharmaceutical companies are scaling back on samples due to their budget cuts.**
