

SOFT RIDE SOLID SKID STEER TIRES

Soft ride cushion solid tires are designed to eliminate all your tire problems. Completely flat proof and extremely durable, Cushion tires can hold up in the toughest working environments. Two rows of full size aperture holes in the sidewall allow the entire tire to flex, increasing traction and providing a semi-pneumatic ride. Cushion solid tires are built from a tough wear resistant rubber compound with 3 times the wearable rubber found in pneumatic tires. Full size construction and extra deep lugs provide excellent traction in the dirt. All tires are shipped on a reusable lock ring style rim ready to bolt on your equipment. Advance Tire stocks a full range of tire sizes and industry specific tread designs making us your one stop choice for all your solid tire needs.
