Re: Craig Berube-Gray Sculpture

To whom it may concern:

The Museum of Art – DeLand issued a Call to Sculptors and selected Craig Berube-Gray's "Pac- Man" for our 2013-2015 exhibit for art in public places. We have found his work to be very durable and his approach to building it on-site to be very unique. This piece has been one of the most photographed works in our current exhibit. Prior to selecting his work we questioned the durability and overturning potential (stability), but upon investigation and now experience we are satisfied that it is quite durable, well constructed and stable. We invite anyone to visit our exhibit to view Mr. Gray's sculpture.
