

Available Assessments Summary

Mark Waldof Consulting LLC www.manageprojectsbetter.com

1) Organization Project Management Assessments

- a) **Organization PM Discovery Survey – Summary Quick Look**
 - An initial summary view of general areas of PM strength and areas needing improvement (not root cause analysis, see comprehensive assessment below)
 - One discovery call or meeting, summary 20 question set, recommendations
- b) **Organization PM Comprehensive Maturity Assessment – In Depth Analysis**
 - The organization comprehensive assessment is intended to form a complete basis for improvements through root cause analysis. This supports the identification of focused specific improvements for a wide range of project management activities.
 - Includes: In-depth assessment using an assessment tailored for the organization, multiple meetings, more than 100 questions, facilitated assessment sessions for multiple teams, sessions for multiple levels in the organization, pre-report meeting, detailed final report w/recommendations, briefing to management and follow-on support.

2) Project Manager (“The Person”) Skills Assessment and Development System

- Provides a comprehensive evaluation of individual PM skills to support focused individual development actions and organization ability to assign the right PM to a project.
- Skills assessment is tailored to the organization’s project environment.
- Includes methods for PM and management communication for PM growth planning.

3) Supplier Management Maturity Assessment

- a) **Organization Level Subcontract Management Discovery Survey – Summary Quick Look**
 - An initial summary view of general areas of strength and areas needing improvement (for root cause analysis, see comprehensive assessment)
 - One discovery call or meeting, summary question set, recommendations provided
- b) **Organization PM Comprehensive Maturity Assessment – In Depth Analysis**
 - The organization comprehensive assessment is intended to form a complete basis for improvements through root cause analysis. This supports the identification of focused specific improvements for a wide range of supplier management activities including source selection, subcontract startup, supplier tracking and other critical phases of supplier management.
 - Includes: In-depth assessment using an assessment tailored for the organization, facilitated assessment sessions for multiple teams, sessions for multiple levels in the organization, pre-report meeting, detailed final report w/recommendations, briefing to management and follow-on support.
