

Florida Utilities Coordinating Committee Sponsorship Levels

Helping Support the Coordination Efforts of the Florida Utilities Coordinating Committee

With more projects and shorter time frames, commitments concerning FUCC sponsorship and participation can be difficult. The FUCC believes that you will find our quarterly meetings beneficial. Our organization represents over 100 utility companies throughout the state of Florida ranging from electric providers to telecommunications (telephone, cable, and fiber) to gas to water to government entities. As we continue to adapt to a changing business environment, the importance of improved coordination and cooperation on infrastructure and utility projects becomes ever-increasingly critical. For over 80 years, the FUCC has been striving to achieve better communication and cooperation between utilities, the Department of Transportation, and the public through improved coordination.

Your generous sponsorship allows these meetings to be held. As FUCC is a non-profit organization with no employees – all funds go directly to offset meeting costs. Our sponsors are special to us, since each person receives direct benefit from you. We have made a commitment to providing sponsors with tangible benefits. Below is a breakdown of the sponsorship levels that we currently offer:
