SECTION F. QUALITY OF LIFE

SUBSECTION F.1. WELL-BEING

ADULTS DO NOT GET NEEDED SOCIAL/EMOTIONAL SUPPORT

Percentage

The percentage of adults age 18+ reporting they could not count on someone for practical help, like picking up groceries, talking about a problem, or providing care.

Source: Behavioral Risk Factor Surveillance System (BRFSS)

Summary: In 2016, 2% of adults in Kitsap County age 18 and older did not have someone to count on to help (e.g. someone to pick up groceries, talk to about a problem, or provide you or a household member with care). This rate is improving over time for Kitsap, and lower than the state's rate of 5%.

Percentage	Early year 2011	Recent year 2016	Statistical comparison of 2011 and 2016	
Kitsap County	3%	2%		n/a
Washington State	5%	5%		n/a
Statistical comparison: Kitsap vs. Washington:

Estimated number of Kitsap residents:	
	63,078

ADULTS REPORT ACTIVITIES LIMITED BY POOR PHYSICAL/MENTAL HEALTH IN PAST MONTH

Percentage

The percentage of adults age 18+ who reported that their activities have been limited by poor physical or mental health on at least one day in the past month.

Source: Behavioral Risk Factor Surveillance System (BRFSS)

Summary: In 2017, 49% of adults in Kitsap County age 18 and older had a health-related activity limitation day in past 30 days. This rate is worse than the state's rate of 47%. In Kitsap County, individuals between the ages of 35 and 64 have a higher rate of limited activities (52%), as well as those those who identify as American Indian/Alaska Native (67%).

Percentage	Early year 2011	2014	Recent year 2017	Statistical trend since 2011

YOUTH REPORT DEPRESSIVE FEELINGS DURING PAST YEAR

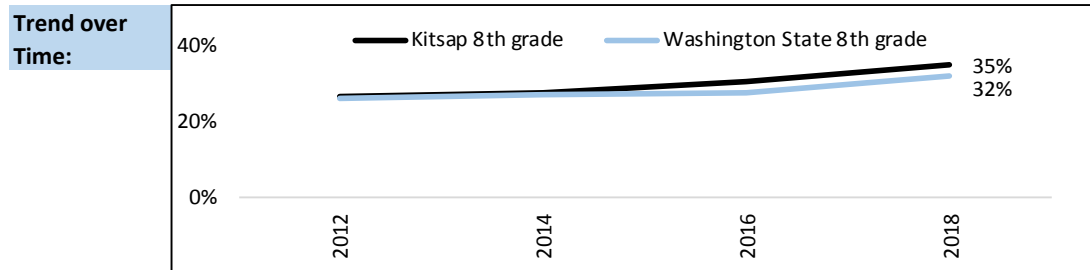

Percentage

The percentage of students who report feeling so sad or hopeless for two or more weeks in a row that they stopped doing their usual activities at least once during the past year.

Source: Healthy Youth Survey

Summary: In 2018, more than a third of 8th graders and 4 in 10 10th graders reported feeling so sad or hopeless for 2 or more weeks in a row that they stopped doing usual activities at least once in the past year. Both Kitsap percentages have increased statistically significantly from 2012 to 2018 and the 8th grade percentage is statistically significantly worse than the state overall. Females have higher percentages (almost 1 in 2!) than males, and 8th and 10th graders identifying as a race or ethnicity other than non-Hispanic White have higher percentages than those who identify as non-Hispanic White.

Percentage 8TH GRADE	Early year 2012	Recent year 2018	Statistical comparison of 2012 and 2018

YOUTH LIVE IN A HOME WITH RISK FACTOR OF POOR FAMILY MANAGEMENT Percentage

The percentage of students who have high risk of poor family management (computed from 7 questions: "My parents ask if I've gotten my homework done.", "Would your parents know if you did not come home on time?", "When I am not at home, one of my parents knows where I am and who I am with.", "The rules in my family are clear.", "My family has clear rules about alcohol and drug use.", "If you drank beer, wine or liquor (for example, vodka, whiskey or gin) without your parent's permission, would you be caught by them?", and "If you skipped school, would you be caught by your parents?")
 Source: Healthy Youth Survey

Summary: In 2018, 39% of 8th graders and 32% of 10th graders had a calculated risk factor of poor family management based on their responses to 7 questions. The 8th grade percentage is increasing from 2012 to 2018 and is worse than the state. The 10th grade percentage is the same over time and roughly the same as the state.

POPULATION WITH A DISABILITY Percentage

Source: US Census and American Community Survey

Summary: From 2013 to 2017, approximately 17% of Kitsap residents had a disability, a statistically significant decrease from 2008-12, but worse than the state overall. This accounts for about 37,903 Kitsap residents living with a disability during this 5-year period. Bremerton has the highest percentage of residents with a disability (20%), followed by South Kitsap (17%). The percentage of the population with a disability increases with increase age, is about the same for females and males, and is slightly higher in those identifying as non-Hispanic White compared to those identifying as other races and ethnicities. This disability type affecting the most people in Kitsap is an ambulatory disability (8%), followed by cognitive disability (7%).

YOUTH BULLYING

Percentage

The percentage of students who report being bullied in the past month. Bullying is defined as another student, or group of students, saying or doing nasty or unpleasant things to someone, or teasing repeatedly in a way he or she doesn't like.

Source: Healthy Youth Survey

Summary: About a third of 6th graders, over a quarter of 8th graders, and just over 1 in 5 10th graders reported being bullied in the past month. The percentage for 6th graders had worsened from 2012 to 2018, but the percentages for 8th and 10th graders were lower than 2012. Only 10th graders had a statistically significantly different percentage than the state overall, and Kitsap was worse. Bremerton School District had the highest percentage of 10th graders reporting bullying of any Kitsap school district, while Bainbridge had the lowest. For both 8th and 10th graders, females reported bullying in higher percentages than males, and those identifying as races or ethnicities other than non-Hispanic White reported bullying in higher percentages than those identifying as non-Hispanic White.
