PLUMBING

From new site construction to building remodels we are licensed in the state of Indiana to work on gas, domestic water supply, and drains of all kinds.

PIPEFITTING

We install process piping for industrial and commercial customers. Including screwed pipe connections, grooved, welded, or food grade process piping we are qualified and experienced to handle any process piping project.

HVAC

In an effort to keep facility maintenance costs low we offer preventative maintenance plans. We will change filters and belts and check operation of all types of equipment prolonging the life of the units and avoiding costly production shut downs, or employee discomfort.

MEDICAL GAS

Hospitals, doctors, and dentist offices require oxygen, nitrous, medical air, and vacuum. We are licensed to install and repair all of these different gasses.

RIGGING

Providing certified riggers to relocate, load, or unload any equipment that our customer may require. We also have certified signalmen to assist in any crane lifts

BACKFLOW INSPECTIONS

We are licensed to install new, repair, or inspect backflow devices of all types. Once we inspect a device we send a copy of the inspection to the local utility provider, customer, and retain a copy for later use if required.
