Recommended Use: As a dietary supplement, take one capsule per day with a meal, or as directed by your health care practitioner.

Our Stabilized R-Lipoic Acid is in the form of Potassium-R-Lipoate, the preferred and only commercially available stable form of R-Lipoic Acid. Binding it to potassium prevents it from polymerizing, which occurs easily due to its hygroscopic nature. This stable, non-hygroscopic, non-polymeric potassium salt form of R-Lipoic Acid does not require any special handling or refrigeration.

Notice: Color, size or shape may appear different between lots.
