

CLEAN - HYDRO SYSTEM

A Cost Effective - Non Chemical System to create reuse water from Produced Water or Flowback Water

Containerized Systems are set at the Well Pad

- Cut Trucking in *HALF*
- Systems allow you to control Silica, Calcium, Magnesium, Boron etc.
- Convert Polymer and Metals into landfillable solids
- Systems operate with various gelling agents

Lower the Cost of Your Water

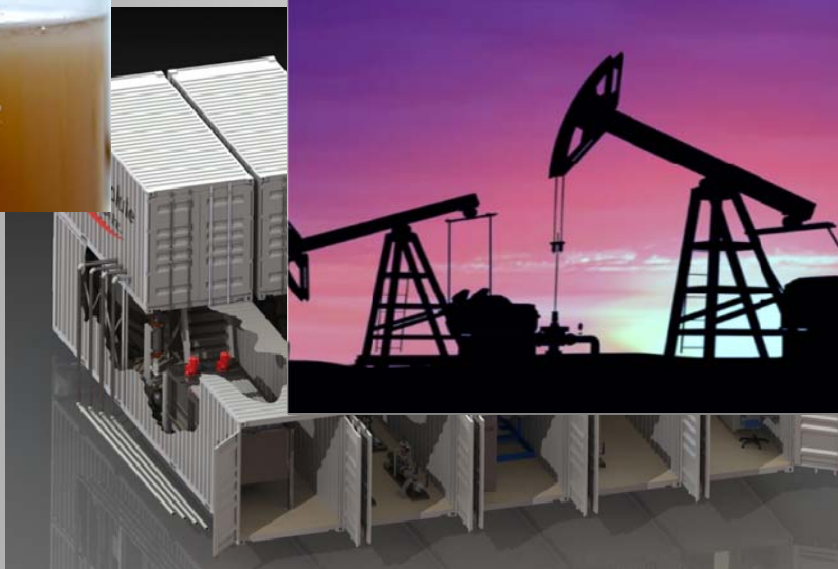

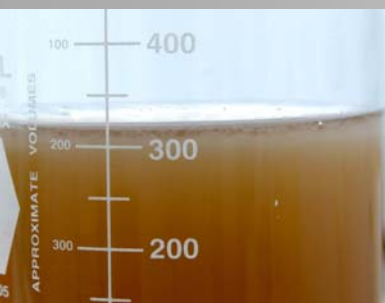

CLEAN - HYDRO
advanced technology
provides the **lowest**
operating cost!

Water Reuse:

- These systems do not use separation chemistry, so they generate a much smaller solid waste volume, as the contaminants are removed
- Complete process removes hydrocarbons, polymers, metals, minerals and organics
- Petroleum is not destroyed but completely removed for sale - generating value
- Dissolved Salt Removal Stage can be added if required

PATENT PENDING

- Self contained, fully automated systems process the water and are monitored with **AGT RSM**
- Containerized System Sizes from 5 to 580 GPM (140 to 15,000 BLD)
- These mobile systems can be moved as required, with minimal plug and play set-up.
- Plant based systems are provided for fixed site requirements
- AGT provides the design, manufactured system, installation and field support
