Available Mounting Flange: NW 150CF/NW100CF/NW63CF

Available Travel Flange: NW100CF/NW63CF

Consult our sales or local distributor for detailed configuration.

The full size XYZ stage is a high specification translator using a single edge welded bellows for X, Y and Z movements.

The single bellows design allows the stage to be mounted in any orientation. It is designed to be configured through a series of modules offering a wide range of installation flanges and clear bores. Please consult our sales department or your local distributors for more information.
