

TRU CERAM

TRU CERAM is a specially formulated wearing compound that was developed for emergency repairs. It is used extensively for repairing severely worn areas of process equipment that must be placed into service immediately. **TRU CERAM** is impervious to moisture which makes it ideal for quick repairs in damp environments. It will set up in 15 minutes at 75° Fahrenheit.

BENEFITS

- Fast cure
- Abrasion resistant
- Acid resistant
- Impervious to Moisture
- Good workability
- Zero error-mixing
- 85% Alumina
- 1/16" diameter ceramic particle size

*

AVAILABILITY

TRU CERAM comes in two convenient sizes - 2 gallon kit, and two 1-quart containers.

Instructions For Use

Prepare area to be patched by removing scale, dirt, and oil if necessary. Mix only an amount required to do the repair at hand. Thoroughly mix Part A to an equal amount of Part B and apply to surface of leaking equipment. If possible, wrap with flexible cloth type material while material is curing.
