

Monkey

2 years to 3 years

Our toddler classroom is designed for hands on learning. Our program is set up to help toddlers develop self-help skills and develop self-confidence. The teachers strive to work with each child in the following development areas: fine and gross motor skills, social and emotional character building skills, cognitive skills and language development skills. The students in this classroom learn through experiment and play. The teachers encourage students to start getting excited to learn, develop a love for reading books and expand their creativity! Potty training takes place in this classroom!
