Program Overview

This course provides participants with an in-depth understanding, knowledge, and skills needed to carry out successful internal and external API Q2 audits. It includes a detailed review of the internal linkages between the elements, key definitions and how they should be audited, and dependencies within the specification. This program included a red team review with API, Operators, Service Providers and Drilling Contractors. The latest methodologies, practices, and techniques are utilized including competency application exercises for the upstream service sector and their global supply chain that supports the petroleum and natural gas industry.

This course utilizes the latest training methodologies and uses a combination of lecture, examination, group discussions, and hands-on exercises to ensure each participant is able to apply the API Q2 Specification from an auditor's perspective. This course covers the linkages necessary to follow an audit trail as well as auditor briefs on each of the specification elements. Throughout the course, participants undergo observations and receive competency assessments by Accredited Providers and Subject Matter Experts. Participants that complete this course will receive a unique tracking and certification number issued by Wollam Groups.

Summary of Course Curriculum

- Critical auditing element linkage
- Key definitions & their application to auditing the specification
- API Q2 Familiarization
- Auditor element briefs
- Stage 1 and stage 2 audit criteria
- Auditing a service quality plan

Who Should Attend

Operators, manufacturers, industry suppliers, 1st, 2nd, and 3rd party auditors, who support the upstream service sector and their supporting global supply chain. This program is designed for quality, HSE, and operational personnel.

This course is utilized by the international, national and state owned oil companies for both training and to obtain a baseline competency assessment by an accredited provider.

API Q2 Auditor Fundamentals

Instructor Biography

Bryan Wollam

Bryan Wollam is the founder and CEO of Wollam Groups. He has three college degrees and holds industry recognized certifications in the areas of business management, quality, occupational health and safety, environmental, reliability and risk management. His education and credentials are backed by more than 20 years of industry and management experience. He has served in leadership positions for Halliburton and Weatherford and has worked closely with the International, National and State Owned Oil companies, service providers, API, COS and BESSE over his career. He is an industry expert sought out by operators and service providers around the world to help with solutions to some of the industry's toughest challenges.

Keith Utter

Keith Utter is an API Lead Auditor and Master Instructor for API and Wollam Auditing Services. He is a graduate of the University of Phoenix and holds industry recognized certification in the areas of auditing, API Q2, API Q1, API Monogram and HSE. He has audited API specification around the globe and has extensive implementation experience. His education and credentials are backed by more than fifteen years of industry experience. He has extensive experience in HSE applications, including 30 CFR, Part 250, API RP 75, ISO 14001, OHSAS 18001, RCISO 14001, OSHA VPP.

Graeme Gillespie

Graeme Gillespie is a Petroleum Advisor with WPAG, his experience in the oil and gas industry spans over 27 years. Working within the upstream sector, primarily in drilling services, he has gained knowledge and understanding in a broad range of disciplines and activities. At the rig-site, Graeme supervised, coordinated and mentored his colleagues in the use of established and newly developed service equipment. In managerial positions, he experienced contract negotiation, administration, and maintenance with clients and suppliers. In the workplace, he is accustomed to directing staff under his responsibility, in line with the company's goals as well as managing their individual demands. Lastly, his career has focused on seeking to mitigate operational risks faced by the industry through the introduction of robust and effective quality assurance systems.
