

!!!!!!!!!!!! SPEED WEEK UPDATE!!!!!!!!!!!!

UPDATE #3 – 8/3/2020

Course dragging continued today. Both courses are really taking shape! Getting smoothed with every pass! The surveyor completed both courses today. The pits are taking shape too. Things are happening fast now! More volunteers will be ready to work in the AM! Starting to look like a race track! Hope to see you soon! Stay tuned for tomorrow's update!

UPDATE #2 – 8/2/2020

Dragging continued today. Starting on Course #2 & then moving to Course #1 in the early afternoon. Heavy drags being used on Course #1 have really smoothed a lot. Dragging will continue tomorrow morning. The outline for the pits was laid out today. Tomorrow the pit layout will continue. The whole thing is coming together! Stay tuned for tomorrow's update!

UPDATE #1 – 8/1/2020

Today was our first full day on the Salt. It rained here a few days ago which has changed the Salt somewhat. Very workable now with the drags. We are dragging Course #2 now & every pass makes it a little better. Still a little rough in spots when we started, it is really smoothing out nicely. We've marked Course #1 & will begin dragging it sometime tomorrow. The Salt is starting to take shape!

We've also visited the market & it is very well stocked & they're just waiting for us! Don't forget a mask! Stay tuned for more updates tomorrow!
