## Fun Facts:

- Blue was the original color associated with St. Patrick's Day. The color green only became associated with the big day after it was linked to the Irish independence movement in the late 18th century.
- Corned beef and cabbage, a traditional Saint Patrick's Day staple, doesn't have anything to do with the grain corn. Instead, it's a nod to the large grains of salt that were historically used to cure meats, which were also known as "corns."
- There are 34.7 million Irish-Americans living in the United States. That's more than seven times the population of Ireland, according to History.com.
