

Street Signs and Stop Signs

Because of a particularly low response (11%) and a robust conversation at the February 8th Commission Meeting, we are seeking your opinion again regarding the replacement of stop signs and street signs in Jupiter Inlet Colony. Below are the limited choices of replacement signs that are being considered. We are proposing ten double street/stop combination signs, five double street signs, and 23 stop signs (some with pedestrian crossing signs beneath them). In addition, we need several specialty signs - No Outlet and Reserved for Town Business.

All signs will be mounted on either dark green or white backed frames on dark green or white fluted poles with bell fluted bases as illustrated. Your choices are as follows (please indicate your choices in an email to pruittj@jicpolice.org).

Please email your responses no later than March 5th:

**Fluted Posts
White / Dark Green**

**Palm Trees (small palm trees adornment between the bottom of the sign and the post)
Yes / No**
