

Cummins is who we are and what we do.

We also offer a number of products that support the engine or the market.

	<p>Cummins is a global leader that designs, manufactures, sells and services diesel engines and related technology. Cummins engines range in size from 31 to 3,500 horsepower. Cummins offers products for Trucking, Mining, Marine, and Construction markets.</p>
	<p>A global provider of power generation systems, components and services in standby power and distributed power generation along with a full range of services and solutions, including long-term operation and maintenance contracts and turn-key and temporary power solutions.</p>
	<p>Formally known as Fleetguard, Cummins Filtration designs, manufactures and distributes heavy-duty air, fuel, hydraulic and lube filtration, chemicals and exhaust system technology products for diesel and gas-powered equipment.</p>
	<p>Cummins Onan produces standby power sets for recreational vehicle, marine, commercial mobile and residential standby.</p>
	<p>Carrier Transicold offers the industry's most complete range of products for container refrigeration, truck and rail refrigeration, and bus and recreational vehicle air conditioning.</p>
	<p>Yanmar produces air and liquid cooled diesel engines starting from 4.5 horsepower for the industrial, construction and agricultural markets.</p>
	<p>Dayco is a leader in research and design, manufacturing and distribution of a broad range of belts, hoses, tensioners and pulleys for the automotive, trucking, construction, agricultural and industrial markets.</p>
	<p>ClimaCab is a battery-powered APU with a state-of-the art control system that continuously monitors changing conditions and adjusts the variable-speed compressor as required to allow for industry-proven performance to cool the sleeper on Class 8 trucks.</p>
	<p>Impco Ecotrans Technologies focuses in designing and manufacturing of diesel-electric Auxiliary Power Units for North American trucks and Locomotives.</p>
	<p>Subaru Industrial Power Products offer a full line of portable generators from 2.9 Kw through 13 Kw for everyday demands. The Silent Series Inverter Generators are rugged, quiet and provide new inverter technology for clean, safe power. Subaru Power Products include a full line of construction Pumps to meet every de-watering application.</p>
	<p>The ComfortPro APU provides reliable heating and cooling along with household electrical power for appliances in the cab. The APU monitors battery charge and warms the vehicle engine.</p>

	<p>Manufactures a top-line charge air cooler that has solved the durability issues that most OEM and aftermarket coolers inherently have. The patented silicon grommet seal withstands the high vibration and thermal expansion which is common in this environment.</p>
	<p>Powerhouse Inverter generators offer whisper quiet clean stable power for light domestic and recreational power requirements.</p>
	<p>Some batteries deliver enormous cranking power. Others offer deep cycle reserve power. ODYSSEY battery is designed to do both. The extreme combination of power and performance makes ODYSSEY batteries perfect for a range of applications.</p>
	<p>Prelub produces a powerful and cost-effective engine prelubrication system that significantly reduces diesel engine wear by automatically building engine oil pressure before the engine is allowed to crank.</p>
	<p>Formally recognized as Kim Hot Start and a leading manufacturer of diesel engine heaters for the trucking, standby generators, locomotives, marine and stationary power markets.</p>
	<p>Designs and manufactures gauges and senders with specialties on tachometers and pyrometers.</p>
	<p>Crosspoint Kinetics manufactures a Hybrid Power System designed for all types of Class 3-7 vehicles where the typical duty cycle includes multiple stop and lower-speed routes. The system saves fuel and reduces emissions for applications such as shuttle buses, refuse trucks, delivery vans and school buses.</p>
	<p>Tech Development manufactures air starters for reciprocating and gas turbine engines. TDI is recognized worldwide by OEMs and system packagers as the leader in reliable large engine starters.</p>
	<p>Idling wastes fuel, increases engine wear, and produces harmful emissions. Webasto provides engine-off heating and cooling solutions that minimize fuel and maintenance costs while provide one of the fastest returns on investment.</p>
	<p>Gentron manufacturers a wide range of electrical generators from 1200W to 10,000W, inverter generators from 2000W to 3500W and propane at 3500W and 6000W to fit commercial, recreation and home needs.</p>
	<p>Cummins and Valvoline pioneered oil formulation and specifications changes to meet the demanding needs in heavy duty diesel operation. The byproduct of this work was Premium Blue and Premium Blue Extreme (synthetic).</p>
	<p>Espar Heater Systems offers a wide range of independent and compact fuel operated and coolant heater products. An industry leader in Excellence in Supporting Product Applications and Reliability, Espar supplies these auxiliary gas/diesel-fired heaters to the truck, bus, marine, automotive/pick-ups, off-highway, cargo and military markets.</p>
