

ALDONEX INC

MANUFACTURER OF QUALITY
DC AND AC POWER SUPPLIES SINCE 1967

AMP HOUR TOTALIZER

Manufactured and Developed in the USA

Aldonex is setting the bar higher with our AH AND AHC Amp Hour Totalizers. Our totalizer utilizes a digital touch-pad interface as well as a 2x16 Character back-lit LCD display. The contrast is user adjustable for easy viewing at any angle. Our totalizer is based on microprocessor technology which is why we are able to deliver unparalleled precision and regulation. The AH and AHC totalizer is truly universal! Shunt or no shunt? No Problem! Our units come in a corrosion resistant plastic enclosure that includes a robust touch pad that is designed to handle the toughest environments. The AHC model includes (2) fused 10A relays to control a rectifier, pumps, or a combo of both! Completely user programmable/selectable.

Standard Features

- 12 Digit Non-Resetable cumulative amp/hour/minute/second total
- 12 Digit Resetable cumulative amp/hour/minute/second total
- EPA Accumulated non-resetable time total
- .000 Amp Hour Resolution(user selectable up to 100A for MIL SPEC applications)
- Supports rectifier shunt sizes from 1A to 30000A (25-200mV)
- If not using a Shunt we have a 1-10VDC User scalable input!
- Blue/White Backlit Display (Great for low light viewing!)
- Dimensions:3.5" x 3.5" X 2.2" (Height x Width x Depth)
- Outside Bezel Dimensions: 3.75" x 3.75"
- Permanent memory (No batteries)
- Corrosion resistant plastic
- Superior Accuracy compared to the competition!

Standard Features (Continued...)

- Supports 12-24VDC (2W) Power Input & 96-264VAC 1 Phase Input with an included AC module.

Controller Option (AHC Models)

- Includes two fused 10A relays for rectifier and or pump control (Beats the competition!)
- Each relay has independent set points/controls

AH-DIN (TOTALIZER IN A ¼ DIN ENCLOSURE)

AHC-DIN (CONTROLLER/TOTALIZER IN A ¼ DIN ENCLOSURE)

AH-WM (TOTALIZER IN A WALL MOUNTED ENCLOSURE)

AHC-WM (CONTROLLER/TOTALIZER IN A WALL MOUNTED ENCLOSURE)
