

Frozen Waterline Facts

Did you know?

That leaving a small amount of water running indoors can prevent frozen and burst pipes.

That frozen pipes can sometimes result in weeks without water and expensive repair bills.

That the cost of running 2-3 gallons per hour costs less than \$2.00 and uses less than 2,500 gallons of water per month?

A leak caused by a broken pipe can use upwards of 100,000 gallons of water, cause major property damage, and thousands in repair costs.
