"Great Tasting... Fresh Ice... Pure Water."

"Great Tasting... Fresh Ice... Pure Water."

The IM2500 “Big Bin” offers an Innovative High Capacity

The IM2500 keeps production high – and machine costs low...

The new Kooler Ice IM2500 Ice Vending Machine is our largest and most productive Ice vending machine yet! The IM2500, like our other Kooler Ice models, offers owners outstanding style, technology and features that are sure to attract the consumer’s attention and make your business rewarding and profitable!

After watching other manufacturers develop large, complex and operationally expensive ice vending machines, Kooler Ice set out to design a highly productive, user friendly, efficient machine at a significantly lower price than the other machines on the market!

The key to the IM2500’s exceptional productivity is that Kooler Ice engineers have utilized the full production capabilities of a moderately sized ice maker by substantially increasing the bin size – increasing storage capacity – to create the perfect balance between bin size and ice maker size. This change reduces both purchase and operating costs - while significantly increasing machine production. This design provides owners with a large inventory of ice on the weekends, when sales are highest, to meet demand.

By design, the IM2500 is built to accommodate additional ice makers as your business grows. A second ice maker offers owners the opportunity to increase their recovery time during peak demand times, allowing the machine to keep up with even the highest demand locations. And because each ice maker can function independently, the owner can elect to scale back the number of ice makers producing ice based on daily volume needs - which allows owners to manage operating costs more efficiently to **MAXIMIZE PROFITS**.

IM2500 shown with optional light kit

Added design flexibility lets you tailor the IM2500 to YOUR target market!

The IM2500 offers these additional machine features as OPTIONS so owners can tailor the machine to their specific locations and demand:

- *The ability to add a second Scotsman C1848 Ice Maker*
 - Either at the time of purchase or later should your demand increase
- *The ability to offer a one and five gallon Filtered Water Vending Station*
 - For areas where water quality is normal
- *The ability to offer a one and five gallon Reverse Osmosis (RO) Water Vending Station*
 - For areas where water quality is poor
- *The ability to add a Credit/Debit Card Reader*
 - To offer the convenience of accepting any method of payment
- *The ability to equip the unit with One 16lb. Vend Selection Button or*
 - Two (a 10lb and a 20lb) Vend Selection Buttons
- *The ability to add a Lighting Package*
 - To illuminate all four sides of the machine at night
- *The ability to add a Heating Unit to machines*
 - For areas where temperatures can drop below freezing
- *The ability to use “One Vend” Coupons to market the machine*
 - Allowing owners to offer promotions and reward programs

Ice Vending Machine with Unique Product Features....

During the design process, Kooler Ice focused on these key design requirements...

- **TARGET MARKET PRODUCTION & CAPACITY**

The IM2500, with its ability to be fitted with one or two Scotsman C1848 ice makers, was designed to be placed in areas where ice sales volumes are expected to be high.

*High Productivity
+ Lower Utility Costs
Higher Profits!*

	Storage Bin Capability	10 lb Max Production/ 24 Hrs**	16 lb Max Production / 24 Hrs**
1 Ice Maker	2300 lbs	329 bags	211 bags
2 Ice Makers	2800 lbs	495 bags	316 bags

**Starting with Full Bin/Ice Production Capability in 24 hours

- **EFFICIENT & CONSERVATIVE USE OF UTILITIES**

The IM2500 machine is equipped with a food grade, molded plastic, foam injected storage bin that is specially insulated so that a refrigeration unit is not needed to keep the ice in storage cold - significantly reducing electricity costs. The IM2500 only requires Single Phase, 220 Volt/80 Amp electric service - helping minimize installation costs.

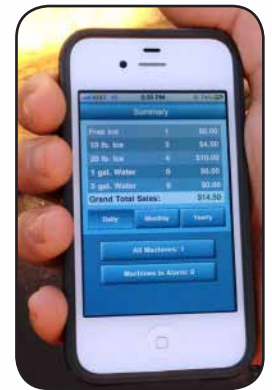

- **INNOVATIVE & EFFECTIVE TECHNOLOGY**

Our **Remote Access Monitoring System** enables owners to manage their machines more efficiently and effectively with the ability to program multiple contacts for machine notifications/alerts via email or text.

This system allows owners to transform operation and sales data into valuable business knowledge, as well as allows machine functions and inventory to be managed at all times from your computer, iPad or "smart" phone.

It improves owner efficiency, allowing for reduced labor time and cost, as well as improved customer service - all of which optimize your machine's revenue!

Cashless Vending Technology: It is well known that Americans are using credit and debit cards more and more to make their purchases. It's all about convenience! Numerous studies have shown that adding the option of the Credit/Debit Card Reader allows owners to raise pricing with better consumer tolerance, to win new business, and to increase overall sales.

Our Remote Access Monitoring System as seen on an iPhone.

- **SIMPLICITY OF DESIGN**

Kooler Ice has always embraced the philosophy of "Keep It Simple"! The IM2500 was designed so that most anyone can use and maintain the unit - regardless of their technical ability. Through the use of a plug and play system, the unit is designed to be easily serviced and the replacement of machine components can be done without requiring a service professional in most cases.

- **CLEAN, EYE-CATCHING APPEARANCE**

The IM2500 was designed to be used in stand-alone applications, such as open areas or parking lots. To achieve a physical presence that is eye-catching, we used a fitted canopy to cover the ice makers so the machine has a sharp, finished look and appearance that customers will find attractive and inviting.

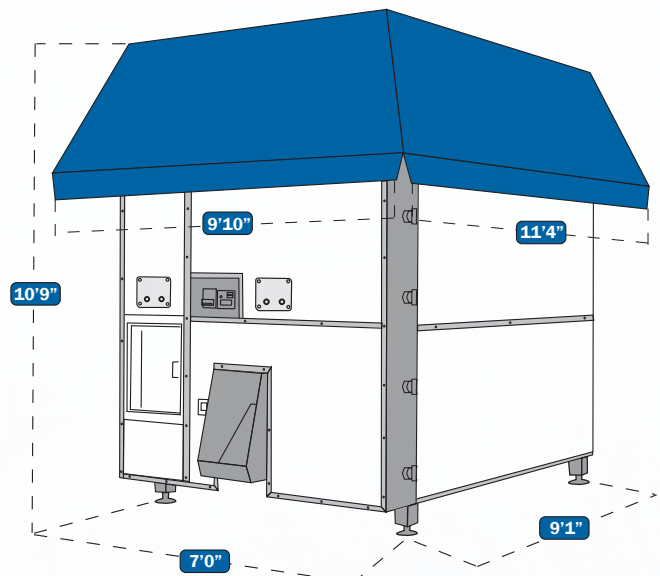

Machine Features:

- Features one Scotsman C1848 Prodigy Ice Maker (Rated at 1909lbs of Ice in 24 Hours)
- Additional Icemaker May be Added to Increase Production
- Insulated Bin – Requires No Refrigeration
- 2300lb Ice Storage Capability with 1 - C1848
- 2800lb Ice Storage Capability with 2 - C1848's
- 220 Volt Single Phase Power, 80 Amp Service
- 3/4" Water Supply Line with 2" Drain-line
- High Strength, Corrosion Free, Aluminum Alloy Frame
- ICETALK 4000 Communication System
- Siemens Electronic Cellular Modem
- Eye Catching High Gloss Lexan Graphics
- Compact Design with Easy Access to All Components
- Easy Bag Changing System - Holds up to 500 Bags
- Unique Bag Tracking System for Consumer Safety
- Adjustable Vend Rate (from \$.05 to \$99.95)
- MEI Extended Bill Cartridge – Holds up to 750 Bills
- Multiple Volume Vending Options
 - 10lb. / 20lb. or 16lb. buttons available

Machine Options:

- 1 and 5 Gallon Water Vending Station (Filtered or Reverse Osmosis (RO) Options)
- Credit/Debit Card Reader
- Light Kit Available, all 4 Sides
- Heating Unit

Machine Weight – Approximately 3,550lbs.

Meet Our Partners - Their Components Make Our Product Great!

- **Scotsman Ice Systems** is a world leader in commercial ice makers. Their line of Prodigy Ice Makers provide excellent reliability and performance and Scotsman provides unmatched service, parts and support. The Scotsman Ice Makers provide a 3 year full warranty, with a 5 year warranty on the Condensor, Evaporator and Compressor.
- **Siemens Electronics** is a world leader in automation products. Siemens PLC's are used to control all machine functions and communicate with the Ictetalk control module. An LCD monitor display on the inside front door of the machine provides information and sales data conveniently.
- **MEI Coin Exchangers and Bill Validators** – MEI is an industry leader with coin exchangers, bill validators, and credit card readers that are easy to operate and service. The bill validator accepts \$1 and \$5 bills, and the coin exchanger accepts quarters, dimes and nickels.

Because the Kooler Ice machines produce ice on site, the need for an ice delivery truck is eliminated, therefore reducing the "carbon foot print". **Our machines help protect the environment** while providing a safer, more convenient, higher quality product than what is available through today's packaged ice system. That's a "Win/Win" for everyone!
