

Organization Level Comprehensive PM Evaluation and Improvement Service

*"A Comprehensive Organization Level PM
 Maturity Evaluation Coupled with an
 Focused Improvement Program"*

Is This a Proven Approach?

Yes. This method of evaluation based improvements has been developed and has been implemented in Fortune 50, 100, 500 and medium sized corporations.

What Is the Process?

- Step 1** – The maturity assessment is tailored to the client’s environment and strategic needs.
- Step 2** – Teams and individuals are identified and the evaluation questionnaires are completed.
- Step 3** – Individuals and teams are interviewed to discuss the results, ask follow-up questions and to identify root causes.
- Step 4** – A detailed findings report is prepared and reviewed with the organization.
- Step 5** – Improvement recommendations and implementation steps are prepared by an industry expert. Support for implementation is provided.

What Is The PM Evaluation and Improvement Methodology?

This is a means to significantly improve the performance of projects through the evaluation of the effectiveness of a client’s project management environment followed by root cause analysis and surgically focused and proven improvement actions.

Why Is This Needed?

The success of projects is due to many factors. Knowledge of the level performance of each of these success factors is a necessary basis from which accurate and effective improvements can be identified. Without an understanding of all of these factors and their root causes, assumed improvements may miss the mark and may actually be harmful to the organization. With a complete evaluation, requirements for improvements are established providing lasting and effective improvements to be realized.

What Areas Are Evaluated?

The evaluation topics are tailored to each client’s environment by starting with the core evaluation topics listed below and modifying the topic areas and individual assessment questions to align with a given client’s environment and strategic needs.

Example Evaluation Categories:

1. Project Results
2. Project Requirements
3. Project Planning
4. Project Proposal Generation
5. Project Startup
6. Project Monitoring and Controlling
7. Risk Management
8. Resource Management
9. PM Infrastructure, Tools and Systems
10. Internal Team Project Reviews
