

## Will you be ready?

Give your officers the life-saving, non-lethal tools to effectively manage crime today.

### Designed by Law Enforcement to Protect Law Enforcement

Unprovoked attacks on police officers are rising around the country. According to FBI statistics, more than half of the officers killed by firearms annually were not wearing body armor when they were slain. Of those who wore vests, most died from either head or neck wounds, or were struck in areas not protected by their vests.

RiggsShield™ is the fastest deploying police ballistic shield from inside a patrol car, giving your officers the time needed to protect themselves and deploy non-lethal options. Patented and made in the USA, it is an NIJ Shot Level IIIa ballistic shield that mounts to the door panel of a patrol car, giving instant access to the shield to protect the head and neck while seated in the vehicle.

The shield is rated to stop up to .44 Magnum, 240 grain, pistol rounds and exceeded the NIJ Level III stab tests in all areas.

Riggs Shield is useful outside the car for patrol functions and protection around building corners.

The ballistic material carries a five-year warranty. And if your RiggsShield is struck while defending an attack, we will replace it for free.

Equip all your patrol cars with Riggs Shield. This design fills the gap of traditional body armor and is priced for law enforcement at less than \$300.

# RIGGS SHIELD™

## No Penetration.

(l-r) Riggs Shield shot with five each: .44 magnum, .38, 9mm and .45 ACP rounds.

Side view shows all the rounds are contained in the ballistic material.

Back side of shot shield shows no penetration.

## Choose your color. Add your Department imprint.

## Easy Installation

Riggs Shield is easy to install with the provided heavy duty Velcro for temporary installations. For a permanent mount in fleet vehicles, countersunk screws are used to mount into the door panel. The installation leaves the door completely functional.

Ask about our training programs to optimize the benefits of Riggs Shield.
