

The Deregulation of Energy | Power to the People

The Energy Market, Natural Gas and Electricity is well over a 500 Billion dollar Industry. People like Bill Gates, and Warren Buffett say that the deregulation of energy will lead to the greatest transfer of wealth in our lifetime. Everybody you know is already paying for these utilities already, the Monopoly is OVER! You now have a choice of who you pay your utilities to, you can even make money off your own bill. Remember back when everyone had to use At&t for their long distance carrier? When the telecom industry deregulated is gave people like you a choice. Many people became extremely wealthy of that. Seize the opportunity!

Free to Choose! Find the Company Right for You!

The United States is transitioning away from energy monopolies. Deregulation of the electricity and gas industry has been mandated by Congress to be completed by 2015. It's already here in Connecticut. Residences and businesses will now have a choice for their energy needs. The Deregulation of Energy is used to introduce competition into the energy industry. This is done by allowing consumers to decide from whom they buy their utilities from. Anybody would be thrilled with options when they must spend money.

A few decades ago, options among energy suppliers were not available. The power market in each state was virtually monopolized. This meant that people had to take the power that they were given, at the price that is was offered, from the source making the offer. The Deregulation of energy has changed this, giving the power to the people. The Deregulation of Energy is a state issue. Some states have seen the benefits and have written legislation regarding energy deregulation. Other states have not been so eager to embrace the idea, thereby denying their residents the power to choose. When it is available, the options provided by the deregulation of energy may go beyond giving home owners and businesses a list of companies from which to choose from, also allowing them to make money off their own bills. Consumers may be able to choose between different types of companies.

The deregulation of energy also provides users with an additional means of recourse when they are not satisfied. A consumer may not be happy with the services provided or she may not agree with an energy company's business practices. Such individuals can take action by spending their money elsewhere. When there were no options, we simply paid our bills. The deregulation of energy often results in consumers becoming more knowledgeable about the industry. There usually are sources

The US Deregulated

Electric & Natural Gas
 Natural Gas Only
 Electric Only
 Electric Deregulation Suspended
 Natural Gas Partial Choice
 Electric Partial Choice

Check out your state to see which services have been deregulated. If you are one of the millions of people you can now begin to shop around for your energy needs. After all we have to pay these bills for the rest of our lives we might as well have a choice who our money is going to! Power to the people!
