

Metal Braces (Silver)

Many adults still have painful memories of the big clunky braces from the past. Luckily, times have changed, and so have metal braces. Modern braces are smaller and more comfortable than ever before with low profiles and strong adhesives.

Tinsel teeth beware: From silver and gold to a rainbow of color, today's metal braces represent a brave new expression of confidence.

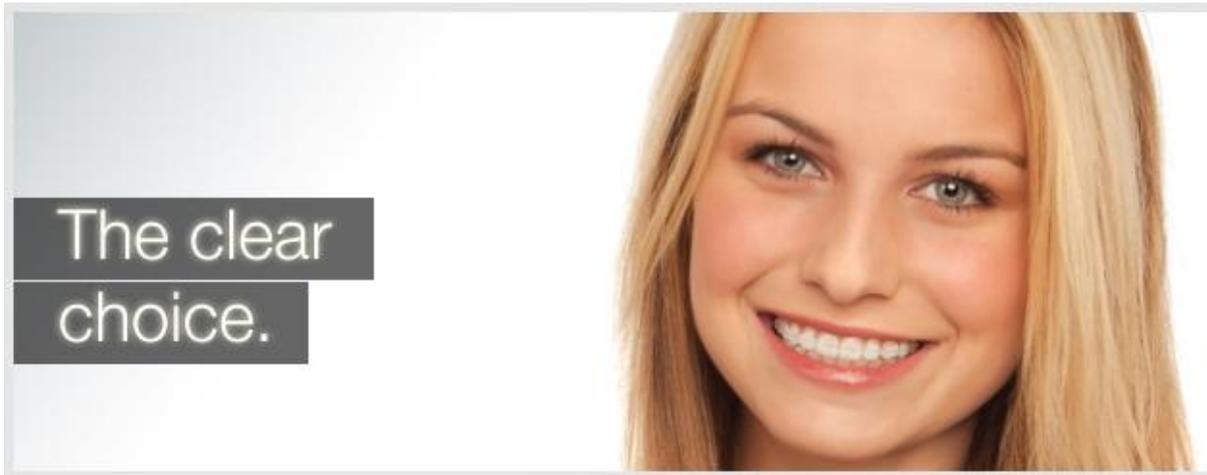

Victory Series™
Metal Braces

Victory Series™ Metal Braces

Introducing the new standard in braces comfort. Victory Series™ Metal Braces work like traditional full size braces -- without the bulk and discomfort.

- Smaller braces enhance comfort and aesthetics
- High bond strength provides firm, corrective forces
- Unique natural curvature provides maximum contact and comfort
- Smooth finish is easier on the lips and gums
- Metal braces with colored bands have become a popular new way to decorate teeth

Ceramic Braces (Clear)

Clear braces are a popular choice for teens who want to make a lasting impression and adults who want to make a less noticeable statement during treatment.

Clarity™ ADVANCED
Ceramic Braces

Clarity™ ADVANCED Ceramic Braces

Clarity™ Ceramic Braces work like metal braces. They blend in with your teeth for a great look. They are a perfect combination of strength and beauty.

- Translucent, designed to blend in with your teeth
- Small and smooth for your comfort
- Smile all you want, there's no staining
- Clarity braces are trusted and used by orthodontists worldwide
- More than 1 million patients have been treated with Clarity braces
