**SABER - Single Automated Business Exchange for Reporting** Join Us in SABER ...

- The benefit to the private sector is that outage or closure information can be provided to a single sharing site rather than 50 states and many other entities requesting status information.
- The benefit to the public sector is that all private sector disruption and restoration information is consolidated in a single source rather than available from hundreds of organizations.
- The efficiency and effectiveness of this new, national approach will save time and money while avoiding gaps, overlaps, and inconsistencies in critical information.

For further information, please contact:

Jim Williams, Walgreens, jim.williams@walgreens.com Jim Morentz, SABER/UICDS, morentzj@leidos.com
