Grow Beautiful. Grow Healthy. GROW WITH MAYER

MAYER is a horticulture and turfgrass products company that is committed to providing proven solutions to meet the highest standards of our customers. We deliver new technology using premium components at a lower cost to our valued customers. Our growing solutions produce desired results.

University micro plot studies prove that our COMAND growth enhancing solutions produce superior results. Roots lengths increased 55-80%.

Our Products Perform

Our products are manufactured using varying blends of high quality soilless components and an engineered compost additive that will consistently provide:

- ▶ Slow Release Macro & Micronutrients fortified with starter package.
- ▶ Beneficial Microbe Inoculant Includes: Bacillus, Streptomyces, Actinomycetes, Trichoderma and Specialized Fungi.
- ▶ Proprietary BioStimulant that includes high concentrations of humic, fulvic, ulmic and alginic acids derived from Norwegian Kelp.
- ▶ Premium Horticulture grade ingredients and innovative blending technology.

Our people are committed to ensuring that you and your team are supported. Our experts provide you with all of the technical tools and information needed to ensure a successful growing experience using our products. Grow your business with MAYER.

We are there for you at every level to educate your staff and your customers on the benefits and value of using our products. We conduct product demonstrations and educational seminars throughout the year and will be there for you when you need us.
