

New from IDenticard® Access Control...

Wireless lock solution using the Schlage® NDE Wireless Lock with ENGAGE™ Technology.

Announcing IDenticard® NDE!

IDenticard's integration with Schlage® NDE Wireless Locks with ENGAGE™ Technology.

IDenticard® NDE Advanced Door Control

IDenticard® NDE is a unique, wireless lock solution available only from IDenticard® Access Control. Designed to fit into a standard cylindrical door prep, the NDE wireless lock provides a quick and easy way to transition from mechanical keys to electronic credentials. IDenticard® NDE combines the convenience of the Schlage® NDE Wireless Lock with the power of PremiSys, offering advanced door control.

- Manage cardholder access rights across all NDE locks in system.
- Video integration with live and recorded video.
- Mobile app for cardholder management.
- Robust enterprise reporting package.
- Mapping for NDE lock location with alert notification
- Schedule reports to automatically email to selected recipients.
- Design and print ID cards.
- Off-line readers connect to PremiSys for updates once every 24 hours through Wi-Fi.
- Upgrade path to PremiSys™ enterprise access control solution.

PremiSys™ Access Control Enterprise Access Control Solution

For more robust applications, PremiSys Access Control is a feature-rich, enterprise solution. In addition to the features of IDenticard® NDE, PremiSys™ Access Control gives you the following:

- Full video integration with live and recorded video.
- Mobile app to manage access control and badging system, run reports, acknowledge alarms.
- Security Management Dashboard to review graphical data of system usage.
- Dynamic mapping with indicator icons to easily pinpoint location of door in alarm.
