

UNILATERAL FIXATOR SYSTEM

Standard, Ankle and Smart Hybrid Fixator

Combining Strength, Versatility and Flexibility
the UniX Unilateral Fixator System

- Standard Unilateral Fixator
- Ankle and T-Clamp options
- Mechanical locking of articulating components allows for non-slip locking
- Modular system - maximum flexibility
- Part of the Smart Correction Family, allowing easy conversion to a hexapod deformity correction system

- The UniX Unilateral Fixator.
- No templates required.
- Serrated locking connectors provide a non-slip locking mechanism.
- Connectors each provide 120° of articulation.
- Central component provides 360° rotation.
- Up to 0-5 cm of compression and/or distraction in each clamp, for a total of 10cm of compression/distraction capability.
- Modular system maximum flexibility.

UniX Ankle Clamp

- Provides acute and/or long-term treatment option.
- Compatible with percutaneous reduction and fixation techniques.
- Proven C-clamp design allows imaging compatibility.
- No templates required.
- Serrated locking connectors provide a non-slip locking mechanism.
- Modular system.
- Maximum flexibility.

- Full, 2/3 and Foot Rings.

- Aluminium and Carbon Fiber constructs.

- Fully convertible to Smart Correction® computer assisted Deformity Correction System.
