Richmond, VA 23235

During the months of July and August 2011, my husband and I had the pleasant opportunity to work with "Off-Grid Green Living Center" and "Solar Trackers USA" during the installation of two solar electricity systems on our adjoining properties.

Although there were some initial delays, mainly due to getting the appropriate county permits, the work, once started was completed in a timely fashion and to our satisfaction.

In addition, the young men working on-site were always polite, congenial, knowledgeable and clean. There was no foul language, unreasonably loud music, litter or cigarette butts, which we appreciated.

Charles Bush, Owner, President, who worked up our contract was always available for questions and concerns during the installation and he continues to be available and helpful each time we call.

Sean Ingles, who supervised the work site managed the crew with professionalism and was able to make us feel confident that he had things under control. In addition, Sean was personable and able to interact with our county officials in a knowledgeable manner when needed.

Overall, we will say that we can recommend "Off-Grid Green Living Center" and "SolarTrackers USA" without reservation for persons interested in solar power for their home.

Sincerely,

Martha and Russell Laub
