To: SSC and Stakeholders

From: Dave Whiteley, Project Manager

Re: Addition to Phase I Report

Thank you for participating in the December 2, 2011 SSC webinar to provide feedback and additional comment on the Phase I report for DOE Project DE-OE0000343. One of the points raised during the webinar highlighted the need to provide some context behind the comments received on the Phase I report and a notation that all of the comments provided are posted on the EIPC website. To address this need, the following paragraph was developed after the webinar through an email exchange between several of the webinar participants engaged in that discussion.

“This report on Phase I of the project is a requirement of the EIPC Planning Authorities’ funding agreement with DOE. EIPC has invited the Stakeholder Steering Committee (“SSC”) and Eastern Interconnection States’ Planning Council (“EISPC”) to provide comments on the report. SSC members and EISPC have provided extensive comments and suggested numerous additions to the report. All comments may be found at http://eipconline.com/Resource_Library.html. Some of those comments and proposed additions have been accepted as pertinent to the EIPC’s Phase I report.”

We plan on incorporating this paragraph into the Forward section of the Phase I report. Please let me know if you have any concerns or questions about this addition.

Thanks again for your time in reviewing the Phase I report and for your input on the drafts that has helped to improve the report.
