

Walk for Water

Walk for Water is a unique, noncompetitive, family-friendly event that offers participants the opportunity to walk in the footsteps of villagers in Cameroon, Africa. Participants will walk with an empty container, fill it up with water and then haul it back to the starting point. This will be reenacting how it is done in villages in Cameroon. Containers will be provided, but participants can bring their own containers, especially for kids to collect water, too. The event also includes a presentation on the 21 wells that have been built and plans for future wells. This event will also feature live music. All proceeds go toward building more wells and improving lives through clean drinking water.

Saturday, Sept 17th, 2016
Boy Scout Lodge
at Iverson Park in Stevens Point, WI
