

D-SACK

DEGRADABLE PLASTIC T SHIRT BAGS

“D only bags that turns to dust
in less than 18 months”

**Americans throw away an estimated 100 billion plastic bags each year.
Only 2.0% of plastic bags are recycled.**

BAG USE PER YEAR

AUSTRALIA: 6.9 BILLION BAGS PER YEAR

IRELAND: 1.2 BILLION BAGS PER YEAR

UNITED STATES: 100 BILLION BAGS PER YEAR

D-SACK bags have a unique additive to the plastic that allows it to completely degrade and turn to dust in about 18 months.
So even if the bag is misused and becomes urban tumbleweed
at least it won't remain an ugly eye sore forever.

**SAVING THE EARTH
ONE BAG AT A TIME**

PACKED 500 per case
