

ON OUR RADAR

THE PEOPLE YOU KNOW. THE RESULTS YOU EXPECT. THE TEAM YOU TRUST.

FROM THE MANAGEMENT TEAM

We believe in exemplary customer service, respect for individuals and a firm commitment to excellence, ethics, honesty and integrity. This approach allows us to pursue and accomplish excellence in our products, processes and people. We will be highlighting individuals in the Executive Management Team in each of our forthcoming newsletters.

Mr. Kevin Walker, Chief Operating Officer, has over 30 years of experience providing management and engineering support for FAA automation programs. Mr. Walker is customer-focused. He is recognized for his reliance on the values of integrity, trust, follow-through and respect as guideposts.

Prior to working at A3T, Mr. Walker worked at URS (formerly Apptis, Inc.) providing technical and managerial experience in support of all URS Transportation Group contract vehicles. He also worked at TMA, Inc. as Vice President of Operations, responsible for oversight of all TMA FAA support contracts.

ITEMS DUE BY DECEMBER 8.

DID YOU KNOW

The SE2025 contract provides a broad range of Systems Engineering, technical, financial, programmatic support services and other aviation related support services, to help Federal Aviation Administration (FAA) transform the country's National Airspace System (NAS) through the implementation of the Next Generation Air Transportation System (NextGen) and related FAA Programs. Contract activities include systems engineering & integration; investment and business case analysis; system acquisition, program planning and management; system development, implementation planning and management; System Life Extension Program/Technical Refresh planning; program and contract management; and business/financial/information management. A3T is currently managing eight complex NAS related Task Orders under SE2025 with an aggregate value of over \$58 million dollars.

CONGRATULATIONS!!

Diane Thomas on her marriage.
Greg Turpin on his baby boy.

BENEFIT HIGHLIGHTS

AXA's Employee Assistance Program is free and is available to help you and your family through work-life issues such as grief and loss support, relationship conflict, finding child/elder care, drug or alcohol abuse, hiring movers or home repair contractors, divorce, adoption, family law, wills, trusts, budgeting, debt, bankruptcy, identity theft services and more.

Dependable. 24/7/365 access.

Confidential, private and secure.

Guidance Consultants will answer your questions and, if needed, refer you to a counselor or other resources. There are also articles, podcasts, videos, slideshows and on-demand training. Their "Ask the Expert" will provide personal responses to your questions.

LOOKING FORWARD

The Business Development Team is working hard to position A3T for additional opportunities with Unmanned Aircraft Systems (UAS). As you know, demand for UAS technology has grown exponentially, but the FAA faces considerable challenges before these systems can be fully integrated into the National Airspace System (NAS). The FAA just released a market survey request for the New Entrants Division (ANG-C2) which supports the evolution of the NAS by integrating research and development (R&D) to refine NAS operational requirements and influence NAS operational improvements and sustainment. ANG-C2 manages the FAA's UAS and Improved Multiple Runway Operations R&D portfolios. This includes program management responsibility for the execution of relevant R&D to support Aviation Safety and NextGen requirements for UAS integration into the NAS, wake separation standards, closely spaced parallel operations, and ground based augmentation system cost benefit studies. The New Entrants Division (ANG-C2) also conceptualizes, investigates, and executes initiatives and capabilities that support transforming the NAS. This includes separation standards (e.g. wake turbulence). Wake Separation Standards is an area that continues to develop and needs to be investigated, and have appropriate standards, processes and practices defined and subsequently bridged from development to operations. If you have any expertise in this area and can help us with this market survey, please contact Derek Chan at Derek.Chan@a3technologyinc.com.
