

Wilson Contractors open their doors at the Streets are Alive in Windsor

Wilson Contractors were successful in winning the Windsor Street Drainage Renewal project for the Invercargill City Council (ICC). The project, located on Windsor Street in Invercargill, involves renewing 365m of foul sewer main and 391m of stormwater main.

Windsor Street is a very popular and busy retail area with a number of boutique shops, restaurants and retail outlets. Minimising the disruption to these businesses and the local residents was paramount.

In an effort to keep the public informed of not only progress, but also show them what was happening and why, the ICC arranged the "Streets are Alive" event. Information boards described what was happening and why.

Families could come onto the actual work site, see an open trench and children could sit in the diggers and trucks.

Despite the inclement weather, a constant stream of families visited the site and enjoyed the chance to see up close what was happening on their local street.
