Side Match Correction
Steaming
Full Service Carpet Cleaning
Concrete and Vapors Emissions Testing
Expert Witness
Cleaning
Carpet Spot Cleaning

I started in the flooring industry in the summer of 1989 working for the family building services company. Off of the Building Services company I started a carpet cleaning business in 1990. After becoming an IICRC Certified Master Cleaning Technician I started to do problem solving for local retailers and then the carpet manufacturers. I started inspecting flooring in 1995 when I was certified by the IICRC. I have continued education in carpet and wood inspections through seminars, tradeshows, recertification courses and refreshers. In 2007 I added Wood Flooring Inspection certification from The National Wood Floor Association and in 2010 I was in the first class of NWFA Certified Commercial Wood Floor Inspectors. I currently perform 50 - 60 inspections per month for manufacturers, retailers, homeowners and distributors. The inspections include residential and commercial installations.

In 2007 became a member of the National Institute of Certified Floorcoverings Inspectors (NICFI). In 2010 business meeting of the NICFI I was elected Vice President. In 2011 I headed the design and implementation of the NICFI Web Site, and Spearheaded the design of the NICFI report writing web site.
