

Brainstorming 100% Reduction in Greenhouse Gas (GHG) Emissions ASAP Campaign

In 2008, more than 1500 educational institutions (mostly colleges, universities) held “teach-ins” titled "Focus the Nation: Global Warming Solutions for America" <http://bit.ly/2E5cwdh>.

In 2009, more than 50 papers worldwide ran the same front-page leader article calling for action at the climate summit in Copenhagen <http://bit.ly/2AJadsY>.

Now, in 2019, when there is clearest urgency (#ArcticFires, #GreenlandIceSheet melting) for highly visible accelerated climate emergency action, this Brainstorming Campaign is calling for 5-10 page overviews on how to reduce Greenhouse Gas (GHG) Emissions by 100% ASAP from 1000s of tipping point related organizations (616 in 30 categories in Appendix 10 of “Brainstorming” paper). The Brainstorming 100% ASAP Campaign also makes a call for 5-10 page overviews from organizations, institutions critical to education, sustainability, communication, emergency assistance, preserving roots of wisdom/compassion, etc. ---as such organizations, institutions are directly or indirectly related to Climate Breakdown mitigation... ---and as part of the many steps still required to provide a comprehensive picture of what actions need to be.

Brainstorming Paper (157p; June, 2019) accessible at <http://bit.ly/321sn60>, or on the homepage of www.cpcsi.org

Collecting such 5-10 page overviews on a clearinghouse website will--

- 1) make available all known key emission reduction pathways in a form most people can read
- 2) provide a clear visualization of transformations needed in every aspect of our lives--since different organizations will focus on priorities in their fields of activity
- 3) provides the equivalent of a needs assessment for local communities, of the kind which precedes Community Visioning [a series of community meetings for maximizing citizen participation in identifying challenges, solutions (see p. 30-36 in Brainstorming paper)-- example Community Visioning: 13 min documentary <http://bit.ly/2uE1XX5>.] Further, education during comprehensive Community Visioning and especially in Neighborhood Learning Centers, ---lead to residents becoming aware of where to buy what material purchases and services they absolutely need, so they can contribute the most possible to carbon-neutral supply chains ---and provides local newspapers, and other news sources, with numerous ways of reporting on this Accelerating Climate Emergency Action process.

Such 5-10 page overviews can be key resource for “over 900 local governments (that) have declared Climate Emergency” (as of 8/2/19)(see The Climate Mobilization’s Climate Emergency Campaign webpage at <https://www.theclimatemobilization.org/climate-emergency-campaign>). This Brainstorming Campaign can accelerate opportunities for people around world to become part of system of mutual support and positive tipping point action in their local communities.
