## AUTOMATIC POOL COVERS DECISION MATRIX

An automatic pool cover is the strongest and easiest way to protect your children and pets from an unsupervised swimming pool. Coverstar leads the way in providing durable, reliable safety covers with push-button convenience! Be sure to carefully consider and compare all the components of auto-cover systems to best meet the needs of your pool and your family.

We make it strong.

# COVERSTAR

*We have the CoverStar auto cover and love it. I have small children as well and we didn't want to take any chances since they play in the same yard that the pool is in. It is very comforting to know that the pool is locked up tight and they can't fall in.*

## Reliable Mechanism

The motor behind Coverstar's automatic cover system is ideally suited to withstand the harsh pool environment.

- Heavy-duty stainless steel bracket components resist corrosion
- Water resistant
- Standard electrical motor delivers 1100 lbs of torque
- Heavy-duty electrical motor delivers 1600 lbs of torque.
- Hydraulic motors available (*recommended for large pool covers*)
- Eclipse stainless steel mechanism includes 20-year warranty
- CS3000 aluminum mechanism includes 10-year warranty

## Heat-sealed webbing

Coverstar's proprietary heat-sealed webbing process is superior to traditional sewn covers.

- Patented process bonds the webbing to the cover fabric using a heat-sealing process (*Other manufactures claim to have heat-sealed webbing, but they are only sealing the webbing around the rope. The webbing is still sewn to the cover fabric. Our process replaces the traditional process of sewing webbing to the cover fabric using thread that tends to deteriorate from exposure to UV rays in a few years.*)
- Lasts for the life of the cover
- Chemical-resistant

## Detachable ropes

Coverstar's detachable ropes improve the operation of the cover.

- Pulls the slider and leading edge of the cover together
- Easily replaced without having to remove the cover from the pool or needing to sew in a new rope
- Tested on a 20 x 50 cover for thousands of cycles

## 3-Channel Under Track

Most pool cover manufacturers use a 2-channel track. Coverstar's 3-channel track provides separate channels for the rope and the slider, which eliminates binding and stress that wears on the mechanism drive.

- Works in all applications that can have an automatic cover (*Includes, raised walls, extreme cantilever, vinyl liner pools, fiberglass pools, free-form pools and more*)

We make it strong. We make it smart.

# COVERSTAR

Another plus is the convenience of it. Any single person can stand there and hit the switch to put the cover on or off. We had just a simple solar cover before our real cover was ready and it was a real pain to get it off and on.

## Adjustable torque limiter

A mechanical torque limiter protects the motorized mechanism from too much stress. It is adjusted during the installation of the cover to give the appropriate amount of torque needed to operate the specific cover.

- Auto-shutoff if the cover meets an obstacle

## 2-inch Stainless Steel Pulleys

Coverstar exceeds the industry standard 1-inch pulleys, using 2-inch pulleys for greater strength and performance.

- Provides 5 times the load-bearing capacity of commonly used pulleys

## Track options

Pools are built in countless shapes and sizes. Coverstar can accommodate a wide variety of configurations.

- Numerous track options allow for automatic covers on many shapes and sizes of pools (tracks can be positioned under the coping of the pool or the flush with the finished pool deck)

## Lid options

Coverstar offers a variety of options for “hiding” the cover box so it integrates well into the pool environment.

- Several options are available for the cover box lid:
  - o Classic Aluminum Lid that sits on top of the finished pool deck
  - o Flush Deck Lid that is poured into place so it is flush with the pool deck
  - o Flat lid includes a beveled edge to create a smooth transition from the deck to the lid
  - o Concrete lids that are the same shape as the coping, allow the cover box to blend in with the rest of the pool deck.
