COLOR CARD

YARNS & COLORS

2122FW Design Concept

Reshape the Future

- Diversified artistic creation giving more inspiration.
- **Soft neutral tones and bright saturated colors contain our reconstruction of the future fantasy and retro spirit.**
- Combining popular elements with practical materials, the compact color card contains all products of 2122FW. With this year's epidemic in mind, this color card will enable you to enjoy the products of YARNS & COLORS.

NEW CLASSIC Main Product

14G*1P 1/36NM
83%VISCOSE 17%ELITE

Alive, insipid, surging, pleasantly surprising, and warm – bringing you true happiness.

ALFRED is an existence.
It is just like a vast sea of stars: delicate, friendly and warm.

Composition characteristics

- Extracted from natural cellulose, Cellulose fiber-viscose is biodegradable. This has the advantages of being naturally healthy, providing environmental protection, and is smooth, cool, breathable, skin-friendly and comfortable
- Uniquely modified polyester fiber is extremely elastic and soft

Appearance

- A unique knot texture on the surface of the fabric, which is smooth and high-grade, showing a matte effect and full of texture
- Woven fabric feeling, excellent anti-pilling performance
- Antibacterial, deodorant/UV resistant.

Application

- Extensive: Knitted fabrics such as skirts/coats/antibacterial materials/socks/sportswear.

OUR
STORY

02/HALEY/CF0548

14G*1P 2/48NM

72% COTTON 28% POLYESTER

Composition characteristics

Cotton fiber has good hygroscopicity. Under normal conditions, it can be absorbed with a content of 8-10%. Has good moisture retention.

- Cotton fiber is a natural fiber, which is beneficial to health and has good health performance due to any stimulation and negative actions.
- Strength polyester, super elasticity and resilience, good toughness, not easy to deform.

Appearance

- Covered with natural cotton fiber and polyester yarn, it is soft, fresh, wide and resilient
- Innovation, seasonal, soft touch, dry and skin-friendly

LENZING
EcoVero™

Composition characteristics

- Ecovero Viscose: It is derived from certified **renewable wood** sources and meets the **FSC** standard. The emission and pollution of viscose fiber can be reduced by as much as **50%**. Natural fibers extracted from trees can be decomposed **by natural micro-objects**, thus effectively reducing pollution.
- Mercerized Wool: Chlorination and protease treatment are carried out on wool, which does not shrink, **feels delicate and has full color**.
- Cashmere: Hollow fiber structure, **breathable** and **comfortable**, with **good warmth and richer** and **softer luster**.

Appearance

- **Environmental protection materials** combined with natural raw materials, **high-grade smooth**, soft and **skin-friendly** texture
- Excellent drape, **high-quality glossy suede**

85%ORGANIC COTTON 15%WOOL

100% natural

Organic cotton and biodegradable wool give you double environmental protection

Saving resources

Restart the sustainable life

Suitable for changing seasons

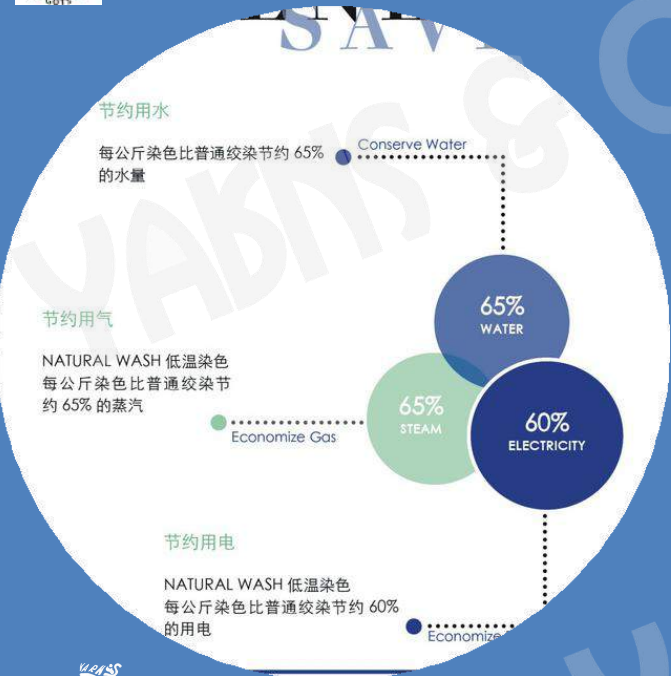

Create a comfortable and healthy life

Retro fashion personality appearance

PINTEREST

Composition characteristics

- Sustainable organic cotton is of great significance to environmental protection and health-alike. Chemical products such as chemical fertilizers and pesticides are not used, and 100% of the organic cotton is naturally produced without pollution.
- Wool fiber, with built-in corrugations, increases the elasticity and extensibility of the fiber, and has good thermal insulation. Excellent wear resistance, shape retention and hygroscopicity.

Special environmental protection dye

- Natural Wash use brand-new washing and dyeing techniques to make fabrics fade and feel mature. Low energy/recoverable dye/low carbon production, and reduced carbon dioxide emission.

Appearance

- Natural old cowboy style, reducing chemical pollution, soft mixing effect and low-key fashion sense.
- Skin-friendly, soft, strong, inherently diverse and environmentally friendly, warm and light. Good elasticity, strong hygroscopicity and warmth retention.

60% COTTON 40% POLYESTER

Fluffy, light and delicate texture

No pollution, no peculiar smell

The color is warm and soft

Even in the bleak autumn and winter, it is
also enough to arouse a lively and uplifting
state of mind

DICTION

Composition Characteristic

- Cotton fiber has good hygroscopicity. Under normal conditions, it can be absorbed with a content of 8-10%. Has good moisture retention.
- Cotton fiber is a natural fiber, which is beneficial to health and maintains a good health performance in any stimulation and negative actions.
- Cotton fiber textiles have good moisture retention because of the accumulation of space between cotton fibers.

Appearance

- Cotton suede with good stability.
- The tape yarn made of cotton and elastic fiber has a ratio of 6: 4 and can be used for knitting knitwear on a flat knitting machine. The fabric is soft, smooth and waxy, strong in strength and wear resistance, not easily deformed and slightly elastic
- Comfortable and natural, soft and skin-friendly, moisture-proof, warm and absorbent

ROGER/FY6879

28/12G*1P/1/14NM/

100% ORGANIC COTTON

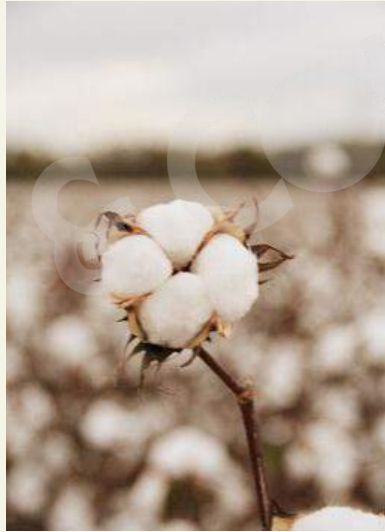

Full suede, with organic cotton raw materials, skin and environmentally friendly, warm hand feeling, highlights simplicity, natural and healthy

Introduction of organic cotton

Different from traditional cotton fields, where a large amount of pesticides are used and pollutes soil, water, environment and ecology and people's health. Organic cotton fields have not applied chemical fertilizers and pesticides for more than three years, and cotton is planted naturally, without using chemical additives such as pesticides, herbicides and dead leaf agents.

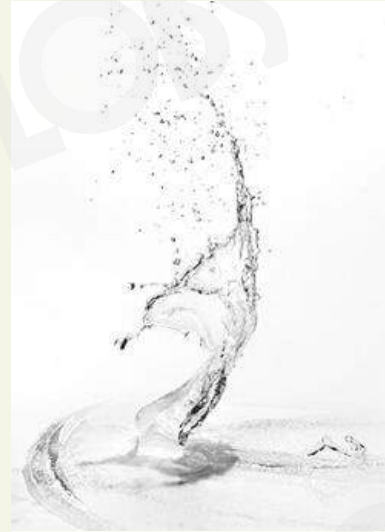

ORGANIC COTTON

PHOTO/PINTEREST

Protect Farmers

Reduces farmers' exposure to pesticides during planting

Avoid soil erosion and protect water resources

Organic farming can reduce soil erosion and destruction, while also reducing pesticide pollution in water resources

Protect children's health

Young children's skin is sensitive and fragile. Choosing clothes made of organic cotton can reduce the exposure of infants to harmful chemicals

ARARE/FY6200

30/9G*1P/1/14.5NM /33% Acrylic 28%Nylon
25%Wool 12%PTT 2%Spandex

The special appearance of woolen feeling reflects the fabric's three-dimensional effect and its color being interlaced, warm and lightweight. The fabric contains elastic fibers allowing ARARE to be comfortable to wear, becoming an essential material for winter woolen coats

Composition Characteristic

- Rare animal fiber wool protects against cold air and keeps body temperature from decreasing

Exceptional Feeling

Blended with PVA, it increases softness and comfort after washing, and it stays 100% wool even after washing, which feels soft and delicate.

Enjoy the price of cashmere,
warm the world

LUXURY Main Product

Alight soft waxy texture

Composition Characteristic

- The main component of the fiber is keratin protein, and the excellent natural environment-friendly fiber is skin-friendly, biodegradable and reproducible.
- 15.5 Micro-ultra-fine aristocrat, with excellent humidity and temperature regulation characteristics, and has two excellent qualities of heat preservation and heat insulation.
- Appearance
 - Allows the superfine wool raw material to meet the touch of cashmere and keep warm well.
 - Fine and elastic feeling
 - Comfortable, natural, soft and skin-friendly, moisture-proof and absorbent
 - The fabric has clear fluffy texture

12G*1P 1/30NM
29%WOOL 13%CASHMERE
54%NYLON 4%SPANDEX

Composition Characteristic

- The fiber is naturally curled, which increases the elasticity and extensibility of the fiber and has good heat preservation. Excellent wear resistance, shape retention and appearance, and good moisture absorption
- Cashmere hollow fiber structure is transparent, comfortable, warm and soft.
- High strength nylon, good toughness, wear and pilling resistance, not easily deformed.
- Elastic fiber spandex, with strong elasticity stretching up to 600%, is wear-resistant.

Appearance

- Ultra-fine napped yarn with a little high elastic fiber. Not only has the texture of cashmere and wool, but also has good elasticity.

Suli alpaca wool, which accounts for 10%
of the total alpacas in the world

Fibers from South America and Peru

Slippery as silk

Soft as cotton

53/CROME/FY6847

Composition Characteristic

- Under the microscope, the fiber surface of Suri alpaca hair is less concave and convex, bright, smooth and skin-friendly
- The alpaca coat stays comfortable and waterproof in wet environment
- Alpaca hair does not contain oil, is not easy to accumulate dust, has no peculiar smell, and is easy to take care of
- The warmth retention performance of alpaca wool is 1/3 higher than that of merino wool with the same weight. It can isolate cold air, not transmit heat energy to the outside world, and stay warm and breathable.
- Alpaca wool has a special hollow structure, which is light, flexible and not easily deformed.

Appearance

- The special bristle hand feel and composition give the fabric lightness and warmth.
