

CITY OF THE FALLEN ANGELS

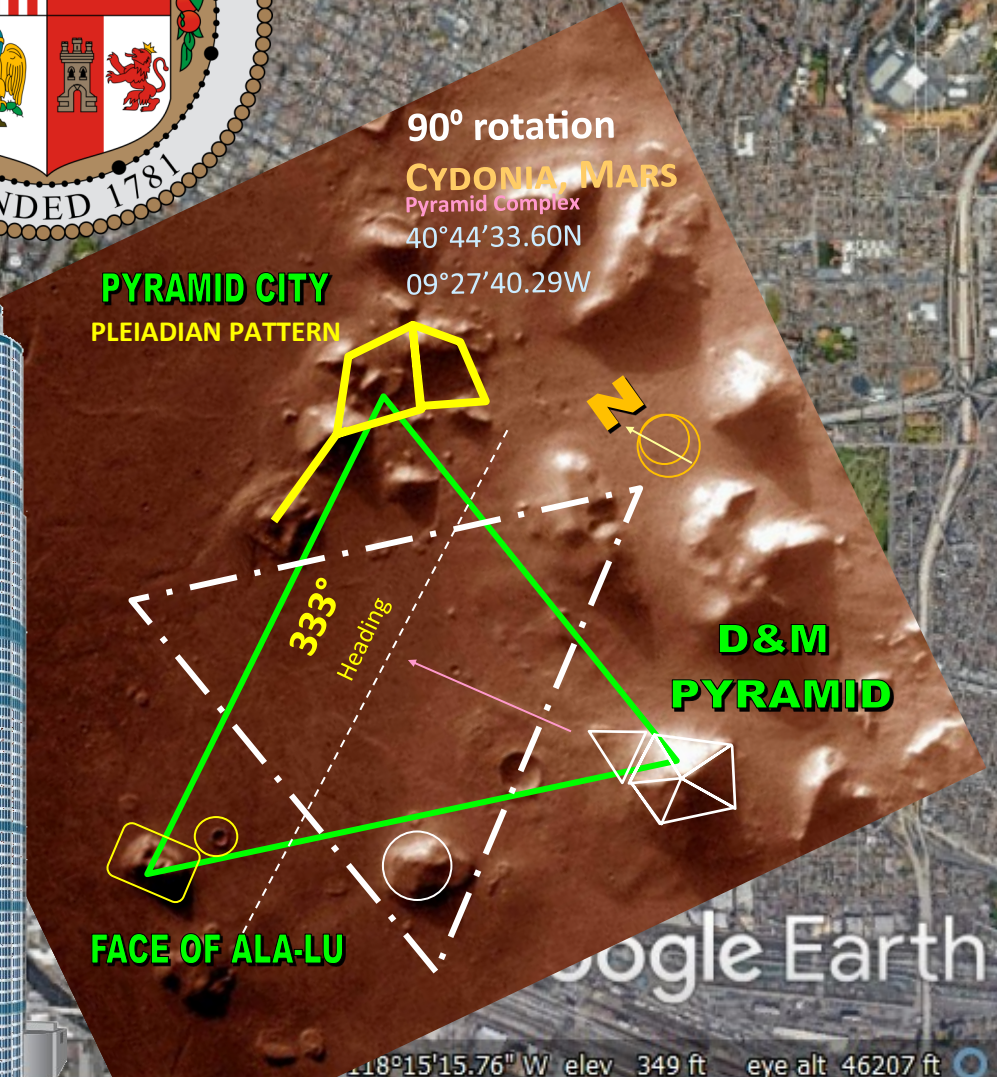

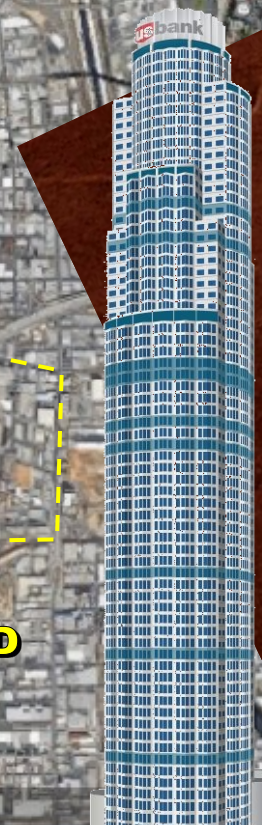

The purpose of this illustration is to suggest that the City of the Queen of the Angels, Los Angeles incorporates the Cydonia, Mars pyramid layout. This configuration includes the Pyramid City, the Face of Ala-lu of Face of Mars, and the Pentagon pyramid. From an aerial view, they do appear to be 3 main centers in L.A. that fit this design. These 3 localities are the Royal Theatre next to the Royal Palace, the L.A. Coliseum and the cluster of Towers in the financial center that is outlined in the Pleiades pattern. The most prominent tower is that of the U.S. Bank Tower has a 'star' platform if one views it from the top perspective. These 3 main designs are also seen in other major world capitals, most notably in Europe that also incorporate a lot of the ancient signatures of the great pyramid complexes around the world. In the case of L.A., California, the triangulation of the sites is a bit elongated and rotated 90 degrees and flipped horizontally. The major difference has to do with the Pentagon structure that correlates with only an un-assuming street design. The question still remains concerning such a Martian motif. Why is there such a construct that venerates an 'other world' civilization pattern it seems?
