

# Savant

## Benefits :

- ✓ **Great Turf Density**
- ✓ **Widespread Adaptation**
- ✓ **Excellent Leaf Spot and Crown Rust Resistance**
- ✓ **Dark Green Color**
- ✓ **Fine Leaf Texture**

## Seeding Rates:

**Overseeding – 2-3 lbs per 1,000 sq ft**

**New seeding – 3-5 lbs per 1,000 sq ft**

Lower seeding rate than regular perennial ryegrass since Savant is Pseudo-Stoloniferous = it has recuperative power and will fill in on its own.

**Savant** is a new generation of spreading perennial ryegrass. **Savant** has dark green color, fine leaf texture and excellent density. Its aggressive spreading habit helps turf fill in faster than other perennial ryegrass on the market. The spreading helps crowd out and control undesirable grasses and weeds. **Savant** has shown excellent summer heat resistance.

**Savant** has widespread adaption and is well suited for use on athletic fields, home lawns, commercial properties, sod farms, golf courses and areas where an extremely durable perennial ryegrass is desired. Use **Savant** alone or in the Natural Knit® or Clubhouse® SPR® blend.
