Name of service: Behavior Modification 6-18 years

Explanation of service: We give you tools to use to change the unwanted behaviors of your children which also includes looking at your own behaviors and how they may affect the dynamic. We assist with communication, discipline, boundaries, developmental understanding, tension reduction, and assist with making agreements. We work with the parents and the children separately depending on your child's age and may request to meet with your child. The goal of this curriculum is geared toward cooperation and communication. Our curriculum is designed to address the specifics of your family. We provide you with a variety of approaches and skills to change unwanted dynamics.

How this works: You will meet with your clinician individually on a flexible schedule. If necessary and wanted, we can provide this service in your home. The curriculum is provided based on the assessment outcome. Goals are established by including the parents' concerns and the children's concerns and are guided by the designed curriculum.
