Student meal accounts will be checked weekly, and if a student’s meal account is \$15.00 or less, parents will be notified via email and text message and a request made to deposit money into their child’s account. If a student’s account becomes \$0 or less, parents will be notified on a daily basis and a request made to deposit money into their child’s account. In addition, when a student’s lunch account becomes 40 or less, they will not be allowed to purchase the regular student meal and instead they will be allowed to purchase a “low balance meal” which is one cheese sandwich and a carton of milk. After the 5th low balance meal, the student will be responsible for providing their own meal including beverage. Students on free or reduced lunches will not be allowed seconds unless they have a positive balance in their meal account.
