

TAKE COMAND OF YOUR:

*Potting Soils*   *Flower Beds*   *Lawns*

### THE ROOT TO HEALTHY PLANTS

**COMAND** is a specialty soil amendment developed specifically for use in potting soils, flower beds, gardens and turfgrass mixes.

**COMAND** is truly a bio-engineered blend of enzyme producing microbes and natural nutrients that accelerates and enhances biological processes in the soil.

**COMAND** can be utilized to amend existing soil prior to laying sod, as a topdressing for existing turf, or as a component of rootzone mixes.

WHAT DOES COMAND DO?

- Improves Moisture Retention
- Supplies Beneficial Microbes
- Protects Plants & Turf Naturally
- Provides Slow Release Nutrients
