

## Dr. Bob Marshall

Our Gratitude goes out to Dr, Marshall for all his life enhancing work.

ROBERT MARSHALL, Ph.D. received his Degree from Columbia Pacific University, Mill Valley, California in 1978. Later, he received a Certified Clinical Nutritionist (CCN) Degree from the International and American Association of Clinical Nutritionists, Texas. He was the President of the Association from 1998-2000.

Dr. Marshall began an unexpected career in Nutrition when he himself contracted a nearly fatal, undiagnosable illness in 1969. Many forms of Medical Therapy provided no help.

To find answers, he extensively studied Nutritional and Biochemical Research, using this information to design his own nutritional program and to ultimately effect a full recovery. Observing the widespread suffering around him, he sought to repay the great help he had been given through Nutritional Therapy.

Dr. Marshall then began providing comprehensive Nutritional Counseling and Lifestyle Programs for the chronically ill. He is one of the most effective Clinical Nutritionists in the U.S. today, having one of the largest Nutritional Practices in the world.

His weekly international radio broadcast, HealthLine, has aired for over 14 years, offering insightful, life-saving information to thousands of listeners on Health and Nutrition. This program airs each Saturday and is networked to 16 states. It can be heard in Southern California on KRLA-AM-870 Saturdays 7:00-7:30 a.m. and on other stations.

Dr. Marshall is one of the authors of the first Computerized Nutrition and Health Habits Evaluation, which has proven invaluable to many doctors to help evaluate their patients' nutritional needs.

Currently, Dr. Marshall is the CEO of Premier Research Labs, which he founded to deliver 100% non-toxic and effective nutritional products. He also maintains Clinics in Torrance, California and Round Rock, Texas, where he continues to test and refine new and existing nutritional formulations.

Founder of Premier Research Labs and Quantum Nutrition, Dr. Robert Marshall is a certified, internationally trained clinical nutritionist, past president of the International and American Association of Clinical Nutritionists, member of the American Society of Tropical Medicine and Hygiene. He is the host of HealthLine, a radio broadcast aired continuously since 1986, currently in over 15 states, and the

author of many research papers and articles. Dr. Marshall has operated one of the largest chronic illness practices in Southern California for many years. Currently his main activities include overseeing Premier Research Labs' manufacturing, as well as writing and teaching professional seminars.

## **A message from Dr Marschal**

Dear Friends and Colleagues,

For many years, PRL has had a sterling reputation as the world's leader in cellular resonant nutrition technology. We have strived to become the industry leader in excipient-free, preservative-free, premier quality nutritional products and super foods.

Back in the 1980's, when I was in full-time practice as a clinical nutritionist (and not yet a supplement manufacturer), I gradually began to be aware of the waning power of the nutritional supplements that I had been recommending to my clients. By 1985, it seemed that the nutritional power of the supplements I was using was mostly gone. As I began trying to find out why, I was harshly struck by the many ways a nutritional supplement can be degraded. I realized that highly undesirable excipients were being commonly used (such as magnesium stearate), ingredients were often irradiated and that the source of a nutrient was often selected merely because it was the cheapest on the market. And yes, I could go on.

By 1987, I knew I had to make a drastic change in order to get the premier quality in nutritional supplements that I so badly wanted for my clients as well as for myself and my family. Thus, Premier Research Labs was born.

Far from obtaining ingredients from the "cheapest on the market," PRL sources its raw materials from trusted suppliers all over the world using our strict purity protocols that we have developed to consistently ensure the premier quality that is the foundation of all our products. In addition, our comprehensive practitioner line of clinically tested nutritional products includes the first targeted organ and gland formulas without animal glandulars.

To deliver the most consistent level of premier nutrition, our in-house, state-of-the-art laboratory uses photoluminescence technology to scan all of our raw materials to ensure purity, correct plant species, and we separately test four-polarity energetics —□ a PRL first in the nutritional industry.

In fact, you will be surprised to learn that one of our nutrient suppliers confidentially told us that many supplement manufacturers commonly request that the nutrients be irradiated because it extends their shelf life so dramatically! Yes, it has been many years since I decided to part from the pack, and I can absolutely guarantee you that I will never knowingly use compromised ingredients in any of our products.

I invite all of you to experience a new dimension in nutritional excellence with PRL.

Warm Regards,

Dr. Robert J. Marshall, PhD, CCN, DACBN  
CEO, Premier Research Labs
