

Audi von der Tetiaroa

(Owned, Trained and Handled by Teri Holycross)

DOB 05/05/07

I adopted Audi at 4 months old she is a GSD. Audi was initially trained in USAR and agility with Daisy. After I was injured and physically unable to deploy to large scale disasters, I switched her to Human Remains Detection (HRD). Audi has excelled at anything and everything. Audi has attended numerous workshops and obtained certifications through AKC Canine Good Citizen (CGC), NASAR as a Canine SARTECH Human Remains Detection (HRD) Land Type III, Canine SARTECH Human Remains Detection (HRD) Water and Canine Disaster Responder for Human Remains Type 1 Forensic level. Audi is also certified with NAPWDA in Human Remains Detection (HRD) K9 Utility Phases, K9 Cadaver Detection Phases. Audi has been deployed during numerous searches in Florida and assisted with a study in Kentucky to see if K9's could detect submerged cemeteries.

During her down time Audi enjoys playing toy, tugging and loves to retrieve toys in the pool.
