

## 40 Children Perish in This Bus Bombing Trump Has Blood on His Hands

This school bus in Yemen was deliberately bombed by the Saudi Air Force on August 9. Yemeni journalists claim that by looking at bomb fragments they can determine that the bomb was a Mark 82 five hundred pound bomb made by a U.S. company. The U.S. sold the Saudis the bombs and gives extensive help to the Saudi Air Force. We call for a halt in arms sales to the Saudi Kingdom and an end to any kind of help for the Saudi coalition war against Yemenis.

We also call for a **Congressional investigation** into what strongly looks like collaboration of U.S. military forces and those of Al-Qaeda in Yemen! This was exposed by a recent Associated Press report. In their zeal to impress the Saudi royals in their attack on the 'Houthi' Yemeni forces the Trump Administration is working with the very forces that committed the massive atrocity in New York City on 9/11. If a U.S. civilian gave anything of value to al-Qaeda they would face a long jail term, but evidently our military and government officials can give material support to al-Qaeda and face no consequences. This is outrageous.
