

10,000 sq. ft. 4-Step Lawn Care Program

Without proper care, your yard can quickly become a battleground of grass vs. weeds.

Fortunately, there's no need for a turf war, thanks to our most requested annual lawn care plan! We show you exactly how and when to feed for a better spring, summer, fall, and winter lawn.

Prepare yourself for the season by evaluating your personal lawn situation:

- Do you need to re-seed your lawn this spring?
- Are you looking to thicken up your existing turf?
- Did your lawn suffer with last year's drought?

Stop by the store for a customized plan or follow our traditional 4-step plan.

What do the numbers on your fertilizer bags correspond to?

N-P-K

Nitrogen (**N**)

Green turf and strong blades

Phosphorus (**P**)

Root system strength

Potassium (**K**)

Disease and Insect resistance

Step 1 ~ 19-0-4 w/ Dimension

Pre and Post Crabgrass control with spring lawn fertilizer

FOR ESTABLISHED TURF ONLY

Apply during the month of April to prevent and kill early crabgrass and help feed a winter weary lawn.

Water this product in after application.

Step 2 ~ 19-0-7 w/ Confront

Post emergent weed kill with turf lawn fertilizer

FOR ESTABLISHED TURF ONLY

Apply 5-6 weeks after step one to post-emergently kill broadleaf turf weeds such as dandelions, clover and much more plus continue to thicken and green up your turf!

This product needs to be applied to wet turf.

JULY IS GRUB PREVENTION MONTH!

Apply Merit grub prevention around the fourth of July to help break up the grub life cycle and stop lawn turf damage this fall.

This product is offered with and without turf fertilizer.

Step 3 ~ 24-0-5, 40% Slow Release w/2% Chelated Iron

Our unique step three turf builder has 2% Chelated Iron for an intense green-up of your lawn during the hot summer months.

This product needs to be watered in after application.

Step 4 ~ 20-0-5, 30% Slow Release

Apply step four to prepare your lawn for the winter. This product will feed your lawn now and store essential nutrients in the turf for the winter months and a quick feeding come spring.

This product needs to be watered in after application.

Other turf products offered at Ventura Grain:

Turf and Garden Lime

The pH of your lawn needs to be around neutral level (7) for optimal grass growth. It is essential to lime your lawn every year to help regulate its pH level.

Lime products available:

50lb bags of Powdered and Pelleted

50lb bags of Solu-Cal Fast Acting Lime

Grub Killing Products

Grub prevention is essential to help protect your root system. Prevention products are applied during the month of July to help break up the Grub life cycle. If you miss the grub prevention step, **DYLOX** is available to help kill adult grubs within 24-48 hours with proper watering.

Surface Insect Control

Help kill surface insects such as fleas, ticks, sod web worms, ants and more with Bifenthrin. It is available with and without fertilizer.

Disease Control

Lawn diseases can occur throughout the season. We have the products to help you fight lawn disease!
