

BRAZEN PLUS

Brazen Plus Customizable Temperature Control Brew System

Behmor Inc. is proud to produce a new brew system that utilizes technologies not found in consumer coffee makers before now; only in commercial brewers. The Brazen Plus Customizable Temperature Control Brew System!

Behmor Inc. has developed the ability for the user to set the brew temperature from between 190-210°F, accurate to within 1 degree F. The Brazen Plus brewer can also ensure that the temperature is accurate regardless of how high above sea level with its altitude corrected calibration technology. When coupled with other features, such as pre-soak, oversized shower-head, and pulsed water flow, the user is guaranteed superior coffee brewing and a terrific cup of coffee. The user can take control of the coffee brewing to achieve exceptional taste. The craft coffee brewing experience at home.

Features:

- **Capacity:** 1.2Liter, 40oz, 8 5oz cups
- **Temperature Control:** Set brewing temperature from 190F-210F(88C-99C)
- **Programmable Brew Start Time:** Wake up to coffee with timed brew setting
- **Ideal Coffee Extraction:** Coffee grounds are fully saturated due to oversized showerhead and pulsing of the water flow.
- **SCAA Certified** for brewing quality based on specialty coffee industry standards (Specialty Coffee Association of America)
- **Elevation calibration:** Adjust your brew temperature based on elevation to achieve a hot cup of coffee regardless of how far above sea level.
- **Thermal carafe** with brew through lid keeps coffee hot
- **Pre-soak** setting allows the coffee to bloom before brewing for better flavor
- **Stainless steel water reservoir** that's easy to fill
- **Permanent filter** included or use paper filters
- **Memory save:** Settings remain, even if the power goes out.
- **Sleep mode:** Saves power when not in use
- **BPA Free**
- **Rated 1400w/ 120v/ 60hz**
- **Dimensions:** 9.2 x 9.2 x 15.2 inches ; 10 pounds
- **2 year warranty**
