

## Ft. Gordon 29717 - Retrofit

Truss Link and Whitehawk/Todd, a joint venture, partnered together to provide turn-key framing and engineering for this retro-fit. Truss Link's engineers, K&P Engineering, provided a full building analysis and EOR services which allowed for a very efficient building design. This is one of 7 retro-fits we, as partners with Whitehawk/Todd, have completed at Ft. Gordon. Each building, though different in design, goes through a strenuous engineering and design process to ensure all framing/dimensions are correct and the structural capacity is in check.

<b>Location:</b>	Augusta, GA
<b>Contractor:</b>	Whitehawk/Todd, a joint venture
<b>Contract Amount:</b>	\$132,950
<b>Approx Sqft:</b>	14,795
